Presentation Highlights

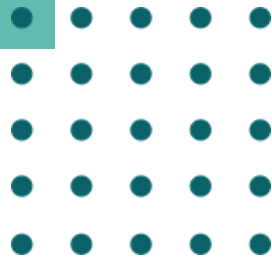

Climate change

**Main terms in
environmental action**

The EU green policies

What will we learn?

- Recognise the importance of climate change and its daily consequences
- Navigate through the environmental terms
- Get acquainted with the main EU environmental policies

Have you ever played “Human Bingo”?

1. checks energy consumption of electronic goods _____	2. spends more than 1 hour in the social media _____	3. can spot a fake news _____	4. has heard about the word climate change _____
5. enjoys cooking good food _____	6. takes the car 3 times a day _____	7. enjoys telling stories to grandchildren _____	8. gets informed about the environment _____
9. likes to take photos with the mobile _____	10. Mainly reads news from social media _____	11. Has ever signed a petition on a cause _____	12. checks news from different angles _____
13. does sport (or similar) activities regularly _____	14. posts regularly on social media _____	15. buys things from a local farmer _____	16. “we were better off when we were worse off” _____

What is climate change?

Climate change refers to long-term shifts in temperatures and weather patterns.

Climate
change

These shifts may be natural, as well as human, especially since the 19th century, due to the burning of fossil fuels (like coal, oil and gas).

Global warming

Check on Google “temperature series” and try to check by yourself how temperatures are changing.

What have you noticed?

Main terms in environmental action

Sustainability

Green Transition

Rare Earths

Greenwashing

Environmental Advocacy

Biodiversity

Tech Waste

Greenhouse Effect

Non-Renewable Energy

Carbon Footprint

Intergenerational Justice

3 billion additional trees to be planted in the EU by 2030

The European Green Deal

The first climate-neutral continent by 2050

At least 55% less net greenhouse gas emissions by 2030, compared to 1990 levels

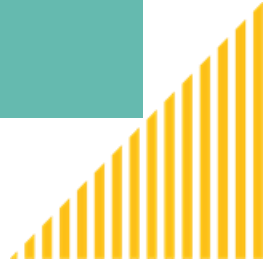

Do you think it is possible to become carbon neutral?
Why? Why not?

What do you consider as carbon neutral?
