IN AGEISM

# What is “Ageism”?

Ageism refers to the unfair treatment or discrimination of people because of their age. It is important for older adults to recognise and address this concept as it involves unfair assumptions about their abilities and stereotypes about their interests. Combating ageism is important to advocate for equal respect and equal opportunities. Older people should recognise and celebrate the diversity of age groups to contribute to a more inclusive and respectful society that values the experiences and wisdom of each generation.
